

EQUIPMENT LEASING PROGRAMS

RRT'S EQUIPMENT LEASING PROGRAM

As part of our commitment to providing the highest quality service available, RRT has formed a strategic alliance with JCM Capital Corporation (JCM) to bring you complete leasing support services.

JCM is headquartered in Melville, New York and has been in business since 1971. Their management has extensive experience in the financing and leasing of equipment to middle market companies nationwide. JCM is a member of the Equipment Leasing Association of America.

RRT, with JCM, will provide service to you from the beginning, during and at the conclusion of your lease.

WHY LEASING

Leasing is a practical, cost-effective way of acquiring the equipment you need to manage or expand your business without incurring the up front cash outlay or running the risk of getting caught with obsolete equipment. By leasing, you transfer the uncertainties and risks of equipment ownership to the lessor, which allows you to concentrate on using the equipment in your business.

In fact, of all the ways to acquire equipment, leasing is the method most frequently used. Today, eight out of ten American companies now lease some or all of their equipment. Business managers have learned that the primary benefits of higher productivity and profit come from using the equipment, not owning it.

ADVANTAGES OF LEASING

- 100% financing is available; and
- Maximize limited budget funds (only the current year's lease payments are included in the operating budget).

RRT, with JCM, recognizes the budgetary limitations faced by business entities and has designed its leasing program to enable commercial businesses, not-for-profits, and municipalities to acquire the equipment needed today, while spreading the payments over the lease term. Whatever your needs are, JCM will tailor a lease to meet your objectives.

FINANCIAL ADVANTAGES OF LEASING

- 100% project financing including all soft costs;
- Quick approval, typically within 24 to 72 hours of receiving all required financial information; and
- Leases can range from \$50,000 to \$100,000,000.

LEASING OPTIONS

There is no limit to the types of equipment that companies can lease, and lessees range from sole proprietors to Fortune 500 corporations. Operating leases can be set up with a variety of payment options, all geared to cash flow needs, requirements, or as a financing lease with different buy out options. Typical types of equipment that are leased include:

- E-Vantage Separator™
- Enhanced Recovery System™
- Super MRF™
- Single Stream Systems
- Glass Pulverizers
- Recycling Equipment

BENEFITS TO LEASING

There are plenty of good reasons to lease. The advantages that your company may derive from leasing depend in part on your specific financial position and what you are looking to accomplish. Some of these benefits may include:

Improved Cash Flow. Leasing provides you with the equipment that you need at a reasonable monthly cost and avoids tying up your cash reserves in costly down payments.

Tax Benefits. Lease payments are generally treated as fully deductible expenses. And, since the lease term is usually shorter than the depreciable life, payments can be expensed in a shorter duration.

Flexibility. You can structure payments to match cash flow patterns, seasonal business, or earnings generated by the equipment. Upon expiration of the lease, arrangements can be made for a renewal, extension or purchase options.

Obsolescence Protection. With today's rapidly moving technology, equipment can become obsolete quickly. With leasing, your risk of getting caught with obsolete equipment is lower because you can upgrade to meet your needs.

Conserve Operating Capital. Leasing keeps your bank lines of credit available for other items such as inventory, personnel, etc.

For a quote on your specific needs and to get JCM's latest rates, please contact us at 631-756-1060, Ext. 119 or e-mail ckaplan@rrtenviro.com
